Cariboo NBSK Pulp

Cariboo Pulp is a fully bleached northern softwood kraft pulp manufactured in Quesnel, British Columbia Canada. This pulp has high brightness and good cleanliness. Its high tear and breaking length make it excellent fiber for the manufacture of many specialty and paper products.

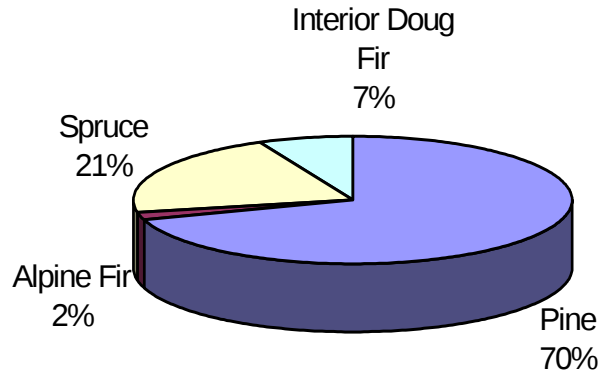

Typical Characteristics

Brightness, ISO	88+%
Moisture	92% AD
Ash	~0.2 – 0.3%
Viscosity	16+ cps
Coarseness	14-16 mg/100m

Bale Properties

Wrapped Dimensions	
Height	15.3in 39cm
Width	32.7in 83cm
Length	33.9in 86cm
Weight	250 kg (export) // 255 kg (domestic)
Packaging	Three wires Export // Two Wires or Strapped Packaging available Two wrapper sheets
